

Energy Products

Products

Here is a sample of some of the products we offer. For more information, please contact us.

IMAGINE a world where energy is so clean it causes zero pollution and so simple you hardly know it's there. No sound, no smoke, no CO₂ - just pure power. That world is here now. That world is solar.

String Inverters, the new generation of PV system technology

Excellent system efficiency

No PV distribution necessary any more

Diagnosis communication via the public utility grid

With the String Inverters of the Sunny Boy product range (700/850/1100E/2000/2500/3000) PV plants from a few hundred watts to several MW can be built.

The Sunny Boy String Inverter can simply be connected to any point in the 230 V house distribution network.

Large-scale plants can be built easily and modularly by multiplying the identical strings. This drastically simplifies planning for PV plants no matter how much power they have.

Bergey WindPower Company is the world's leading supplier of small wind turbines. With installations in all 50 States and more than 90 countries, Bergey wind turbines have proven to be the best-built and most rugged turbines available.

Bergey WindPower takes pride in offering advanced-technology products that let homeowners generate their own clean power and that can help bring modern services and new opportunities to the world's rural poor.

ROOFTRAC® PHOTOVOLTAIC (PV) TOP-DOWN MOUNTING SYSTEM

The original and patented "top down" Photovoltaic (PV) Solar mounting rack system utilizes the patented slide-n-clamp mounting hardware to change the structural properties of the aluminum rail.
