

## Commercial Monitoring

Business customers with special interval data recorder (IDR) meters have access to a powerful set of online templates to give them an unprecedented view of their energy use.

SDG&E's kWickview energy monitor is a free online tool that can help businesses to better sync their energy usage with their business operations.

kWickview aggregates the data in 15-minute intervals and makes it available each morning. Here are some of the things you can do with kWickview:

- View energy usage data in 15-minute intervals
- Generate detailed reports on your energy usage
- Create and compare different energy use scenarios

Try the link below to see how kWickview can help you look at your company's energy use like never before.
